

Pricing Policy

Use MediSecure eScript at No Cost

MediSecure fees are reimbursed from Medicare via PBS online. Totally funded under the 7th Community Pharmacy Agreement.

You receive the 15c incentive payment for every eligible barcoded script dispensed.

Medicare pays the 15c along with your other PBS payments. You do not need to submit any reports or other paper work.

MediSecure will not charge you more than the 15c incentive payments you receive from Medicare.

MediSecure is required to levy GST which you then claim in your BAS.

		Total PBS		3,560.18
		Repatriation benefits	310.75	3,870.93
		Incentives		
		*Dispensing scripts 115	293.95	
		Total (PBS + RPBS + Incentives)		4,164.88
		Fees		
		*Electronic Prescriptions 115	23.55	
		Total (PBS + RPBS + Incentives + Fees)		4,188.43
3753	1234563789645	General benefits	543.55	
		Concessional benefits	1,780.40	
		Entitlement (free) benefits	1,236.23	
		Total PBS		3,560.18

Note:
The PBS claim combines your eScript use from all eScript providers. If you use many eScript providers you will be billed separately for each.

MediSecure eScript Cost Neutral Policy FAQs

eScripts are effectively free for all pharmacies using MediSecure.

MediSecure fees are reimbursed from Medicare via PBS Online

How can MediSecure be at No Cost?

MediSecure fees are reimbursed as part of the 7th Community Pharmacy Agreement (7CPA). MediSecure will not charge you more than the incentive payment you receive.

What is the Electronic Transmission of Prescriptions (ETP) Incentive payment?

The ETP payment of 15c per script (item) is paid to pharmacists for dispensing of PBS, RPBS and under co-payment barcoded scripts that are generated electronically by prescribers. The fee is designed to off set the costs charged to pharmacists by ETP service providers such as MediSecure.

Will I be charged by MediSecure for scripts that are ineligible for the ETP incentive payment?

No. Under MediSecure's Cost Neutral Policy you will only be billed for scripts for which you receive the payment from the government. You can process "ineligible" scripts through MediSecure FREE of charge. So you can enjoy the benefits of eScripts without concern for the costs.

Do I need to register for this program like I do in other agreement programs?

No. You do not need to register with Medicare Australia for this program. You do need to register with MediSecure at www.medisecure.com.au. MediSecure now comes packaged with choice dispensing software. This means you can enjoy the benefits of ETP with little work on your part.

Is the ETP incentive payment paid on private scripts?

No. You will not receive the incentive payment for private scripts. You can still scan these scripts as usual and you will not be charged by MediSecure.

Why do I get different bills from different ETP providers?

MediSecure only bills for Medicare PBS payment eligible electronic scripts dispensed using the MediSecure service. If you connect to multiple ETP providers then you may receive more than one ETP provider bill. Each provider will bill for the barcoded scripts processed through their service. To simplify your billing call MediSecure on 1800 47 27 47 and ask to have all your electronic prescriptions processed through MediSecure.

What scripts are in eligible for the ETP incentive payment?

Private scripts and repeat scripts where the original script was not sent to MediSecure by a doctor. You can still scan these scripts (originals and repeats) and they will still work through MediSecure. You will not receive the incentive payment and you will not be charged by MediSecure.
